Ashraf Hebish

AI & Data Science Student | Data Analytics & Python

Damietta, Egypt | ashrafhebish23@gmail.com | linkedin.com/in/ashraf-hebish-b16370360 | Portfolio | github.com/ashrafhebish

Professional Summary

AI & Data Science student at Horus University in Egypt, with diploma training in AI & Data Science (Arabian Academy, Grade A) and AI & Machine Learning (Route Academy). Builds practical, data-driven applications in Python and JavaScript, including a 12-phase statistical analysis pipeline written without external statistics libraries and an interactive numerical methods lab. Holds certifications in Generative AI, Responsible AI, Data Visualization and Prompt Engineering.

Technical Skills

Programming Languages:	Python, JavaScript, HTML, CSS, Java
Data & Analytics:	Data Cleaning, Data Visualization, Descriptive Statistics, Hypothesis Testing, Confidence Intervals, ANOVA, Numerical Methods, CSV Data Processing
AI:	Generative AI, Encoder-Decoder Architecture, Responsible AI, Prompt Engineering
Tools & Platforms:	Git, GitHub, GitHub Pages, Chart.js, LocalStorage, Microsoft 365 Copilot
Web:	Responsive Web Design, UI/UX, Offline Single-Page Web Apps

Projects

Smart Budget | *Python, JavaScript, HTML, CSS* Live Demo

- Built a monthly budget manager that splits income by the 50/30/20 rule, a 60/20/20 high-rent mode or custom ratios, and tracks actual spending against the plan.
- Ported the original Python program to JavaScript as an offline web app with an expense log, monthly report, CSV export and browser-only data storage.

Numerical Methods Lab | *JavaScript, Chart.js* Live Demo

- Developed an interactive lab implementing six numerical methods: Bisection, False Position, Newton-Raphson, Secant, Thomas Algorithm and Jacobi iteration.
- Added live function and log-scale convergence charts, step-by-step iteration mode, side-by-side method comparison, calculation history and JSON export.

Statistical Analysis Pipeline | *Python, JavaScript* Live Demo

- Built a pipeline that ingests any CSV file, detects numeric and categorical columns automatically and runs 12 analysis phases from data cleaning to conclusions.
- Implemented descriptive statistics, confidence intervals, t-tests and ANOVA by hand using Python's `math` module, without SciPy.

Education

Horus University in Egypt
B.Sc., Artificial Intelligence & Data Science *2024 – 2028 (Expected)*

Arabian Academy
Diploma, AI & Data Science *Jul 2026 – Sep 2026*

Route Academy
Diploma, AI & Machine Learning

Certifications

- **Arabian Academy:** Data Science & AI Course (60 hours, Final Grade A) 2026
- **Edraak:** AI in the Workplace: Tools and Practical Applications • Data Visualization for Decision-Making 2026
- **Mahara-Tech (ITI):** Java IO and Network Programming 2026
- **Other:** What Is Generative AI? • Introduction to Responsible AI • Encoder-Decoder Architecture • One Million Prompters • Microsoft 365 Copilot for Work (2025)
